

PUCCS Pre-Wrapped Starter Strips

PUCCS Pre-Wrapped Starter Strips are comprised of Type 1 PUCCS EPS insulation, DuROCK base coat, and DuRock 5 oz. reinforcing mesh, configured as shown in the illustration below.

PUCCS Pre-Wrapped Starter Strips are intended for use at the lower extremities of the PUCC System to facilitate drainage. Drainage locations include, but are not limited to, window heads, expansion joints, termination at grade, and termination above roofs, balconies, decks, other claddings, and soffits.

PUCCS Pre-Wrapped Starter Strips are six inches wide, eight feet long, and are available in thicknesses ranging from two inches to six inches.

PUCCS Pre-Wrapped Starter Strips are adhered to the WRB in the same manner that PUCCS EPS insulation board is adhered.
